

Prajwal Yadav

Software Engineer

I enjoy to think over problems in a variety of fields, find solutions to them and execute them, in co-ordination with a team wherever required. Interested in innovation and technical learning, particularly in android, java-development and web-development.

PERSONAL PROJECTS

Mess Manager | Android App

- Mess Manager is an android app that assists the work of mess supervisor. QR code is generated that can be scanned and meal is recorded for the particular individual. Everyone needs to register before, for having the meal and the price of meal is deducted only for that individual.

Comportal | Django Website

- Comportal is a Django website used to register the complaint. Notification will be sent via mail to the concerned authorities. The pdf of the registered complaint can be printed and submitted, if required. It can be upvoted if it's a common problem.

I-Ray | Java Software

- I-Ray is a Linux ide which assists in writing and compiling the code, making things easier for a casual programmer. It can compile and run C, C++, JAVA and PYTHON codes on the go. A programmer can work on different tabs simultaneously.

PeCon | Android App

- PeCon helps the user to connect to the persons they care for. It marks the real time location of the friends and family members on the map. It works in the similar way as other friend locator apps. It includes features like calling the emergency no, in the time of distress, it also helps to keep the notes of the particular person.

WORK EXPERIENCE

Summer Intern Visa Inc.

05/2019 – 07/2019

Project

- Speech Enabled IVR (Interactive Voice Response): Natural Language Speech Recognition was implemented in the existing IVR app and enhanced for better recognition. New speech enabled features were added for improving customer experience. Overall reduction in time duration as well.
